Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The drawing filed 01/13/09 has been approved. However, the drawing is further objected to as failing to show and label the pilot elements in claim 3. Correction is required. The introduction of new matter should be guarded against.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claims are indefinite since it is unclear whether they are combination claims including a control system, a shovel, a boom, a boom cylinder and a shovel cylinder or are subcombination claims including only a control system. This indefiniteness is caused by a recitation of a machine having a boom, a shovel and boom and shovel cylinders in an intended use phrase in the preamble of claim 9 and a positive recitation of the control system elements connected to or configured to control or receive these machine elements in the body of the claim. For examples, note configured to control, operably connected to and configured to receive, all in claim 9. Further it is unclear what structure and/or arrangement is intended by the phrases configure to control and configured to receive further rendering the claims indefinite.

Further regarding claim 3, this claim is indefinite since it is unclear what structure in the applicants' detailed disclosure comprises these pilot control elements.

Further regarding claim 7, the phrase "or to the control lever, respectively," renders this claim inaccurate since the transmitting member is only connected to the spring assembly not to the control lever. The spring assembly is connected to the control lever. See applicants' figure 1, elements 20, 26 and 28.

Further regarding claim 9, this claim is incomplete since it does not claim the biasing system in either figures 1, 2 and 3 which appears vital to operation since the biasing system balances the lever position and movement. Note claims 5 and 6 each obviate this rejection.

Applicants' arguments have been carefully considered but do not obviate the above noted rejections for the reasons noted above.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
